

ECOFORUM event 2025

Logo

The logo of the Eco Forum event features simple shapes of planet Earth resting on a plant, symbolizing the close connection between the health of our planet and the importance of nurturing nature. The Earth on a plant signifies that our planet relies on the environment to thrive, emphasizing the need for sustainable practices that protect and preserve both. This visual message encourages us to recognize the vital role we all play in caring for the Earth, urging collective action to ensure a healthier, more sustainable future for generations to come.

Pattern

The pattern also features simple, plant-like shapes, which I thought was perfect for this subject. It reinforces the theme of nature and sustainability, complementing the message of caring for the planet.
